

BlueVibe Browser

The Bluevibe Browser is the **world's first Bluetooth-based** mobile web browser, giving your customers free access to web services **on their mobile phones**.

The Bluevibe Browser works via Bluetooth in the proximity of [Bluevibe Hotspots](#) (i.e. within Bluevibe zones). It also works everywhere else, using **GPRS/3G** or even **WiFi** (all depending on availability), to provide access to the same services.

Popular Web Services

These are just some of the web services you can have access to, using the Bluevibe Browser:

- Facebook
- Weather
- Instant Messenger (MSN, GoogleTalk, Facebook)
- Livescores
- Flickr
- Wikipedia
- <Your own here>

[Contact us](#) to find out what BlueZone Media can do for you today, that others won't do until tomorrow!

Bluevibe Browser Highlights:

- **xHTML support** gives you access to thousands of websites!
- Runs on the **majority** of today's mobile phones (not just particular models!)
- **Create your own web services** and give them to your customers through the Bluevibe Browser.
- **Bluetooth** connectivity means free access !
- **Cutting-edge** graphics interface based on the powerful Fire engine v2
- **Download content** through Bluetooth.
- **Fully customizable** interface and services according to your needs
- **Branding ability** so you can have your own YourBrandNameHere Browser.
